THE UNIVERSITY ALMA MATER

Hail to Alma Mater!
We will sing thy praise forever;
All thy sons
and daughters
Pledge thee victory and honor.
Alma Mater,
praise be thine,
May thy name forever shine!
Hail to Purple!
Hail to White!
Hail to thee, Northwestern!

THE CAP AND GOWN

The cap and gown are worn by each participant in the Commencement exercises. The cap is worn throughout the ceremonies, except that men remove their academic caps for the National Anthem, the Invocation, and the Benediction. Gold and silver cords represent the Mortar Board Senior Honor Society. The tassel colors are as follows:

Arts and Sciences	<i>White</i>
Medical	<i>Green</i>
Law	<i>Purple</i>
Speech	<i>Silver Gray</i>
Dental	<i>Lilac</i>
Music	<i>Pink</i>
Graduate School of Management	<i>Acorn</i>
Journalism	<i>Crimson</i>

HONORARY DEGREES

ARDIS KRAINIK—DOCTOR OF FINE ARTS

Opera company executive. B.S. Northwestern University, 1951. Following study in Northwestern's Schools of Speech and Music, she taught drama briefly at the high school level before embarking on an operatic career where she appeared in supporting roles as a mezzo-soprano with the Chicago Lyric Opera and in numerous opera, oratorio, and concert engagements throughout the Midwest. In 1976 she became Artistic Administrator of the Lyric; in 1981, she was appointed General Manager. Under her direction, the Lyric Opera overcame chronic financial difficulty and enjoys wide recognition as one of the nation's foremost operatic organizations.

Presented by Betty A. Van Gorkom, Trustee, Northwestern University

RONALD GODFREY LIENHARDT—DOCTOR OF LITERATURE

Social scientist, educator. D. Phil. Cambridge University, 1952. University Reader in African Sociology at Oxford University, he is the author of *Divinity and Experience: The Religion of the Dinka*, a ground-breaking study of African religion in the South Sudan. Employing sensitive linguistic techniques and avoiding Judeo-Christian biases, his book represents the culture of the Dinka people in their long reflection of the human condition and their confrontation with the transcendental. Lienhardt is also General Editor of the Oxford Library of African Literature, a series which has published many volumes of African poetry and prose both in English translation and in its original vernacular version.

Presented by Mary T. Douglas, Avalon Foundation Professor in the Humanities, College of Arts and Sciences

HARRY BARKUS GRAY—DOCTOR OF SCIENCE

Chemist, educator. Ph.D. Northwestern University, 1960; Arnold O. Beckman Professor and Chairman, Department of Chemistry, California Institute of Technology. Elected to the National Academy of Sciences at the age of 35, Gray is the author or co-author of 14 books and more than 300 articles in bioinorganic chemistry and inorganic photochemistry. His pioneering research on electron transfer processes involving metal ions in proteins is fundamental for the understanding of how energy is stored and transferred in living systems; his investigations of the photochemistry of multimetal clusters are important for the development of energy storage systems.

Presented by A. Louis Allred, Professor of Chemistry and Chairman of the Department, College of Arts and Sciences

PHILIP M. KLUTZNICK—DOCTOR OF HUMANE LETTERS

Industrialist, government official. LL.B. Creighton University, 1929. A lawyer by training, during the 1930's he administered a \$100,000,000 program to build public housing in his native Omaha; in 1944 he was appointed Federal Housing Commissioner. Later he served as U.S. Representative to the United Nations Economic and Social Council, with rank of ambassador; as a member of several delegations to the UN General Assembly; and from 1979 to 1981, as Secretary of Commerce. One of America's leading real estate developers, Klutznick was instrumental in the construction of a model city for Chicago-area veterans of World War II, Park Forest, and of such shopping centers as Old Orchard and Water Tower Place.

Presented by Eugene M. Lerner, Professor of Finance, J. L. Kellogg Graduate School of Management

ALICE S. ROSSI—DOCTOR OF SCIENCE

Sociologist, educator. Ph.D. Columbia University, 1957; Professor of Sociology, University of Massachusetts. Recognized for her pioneering work in the study of the sociology of knowledge, historical sociology, and bio-social factors in socialization, she has also written extensively on the nature of sex stratification in contemporary American society. Among her books are *Academic Women on the Move* (1973), *The Feminist Papers: From Adams to deBeauvoir* (1973), *The Family* (1978), and *Feminist Politics* (1982). She has served as President of the American Sociological Association, was a founder of the National Organization for Women, and in 1983 received the Jessie Bernard Award.

Presented by Peter E. Rossi, Assistant Professor of Managerial Economics and Decision Sciences, J. L. Kellogg Graduate School of Management

O. C. ZIENKIEWICZ—DOCTOR OF SCIENCE

Engineer, educator. B.Sc. Imperial College, University of London, 1943; Professor and Head of Department of Civil Engineering, University of Wales, Swansea. Since beginning his work on finite element methods in the early 1960's when the method was still largely unknown and its powers not yet explored, he has become a central figure in the development of the method, which has revolutionized the practice of mechanical and civil engineering and related sciences and is a key ingredient in computer-aided engineering analysis and design. Zienkiewicz is the author of three books dealing with the finite element method and is founder and editor of the *International Journal for Numerical Methods in Engineering*. Between 1957 and 1961 he was Professor of Civil Engineering at Northwestern.

Presented by Jan D. Achenbach, Walter P. Murphy Distinguished Professor of Civil Engineering and Applied Mathematics, Technological Institute

RICHARD HUNT—DOCTOR OF FINE ARTS

Sculptor. B.A.E. Art Institute of Chicago, 1957. His work has ranged from linear, biomorphic, almost insect-like forms to chunky and solid sculptures from which spike-like aggressive shapes erupt. A life-long resident of Chicago, he has had one-man shows at such museums as the Art Institute of Chicago, the Cleveland Museum of Art, and the Museum of Modern Art in New York; his works are included in the permanent collections of those museums and many others here and abroad. He has taught at Northwestern, Yale, and Washington University in St. Louis. Among his prizes and fellowships are the Frank G. Logan Medal and Prize awarded by the Art Institute of Chicago and a Guggenheim Fellowship.

Presented by Edward F. Paschke, Professor of Art and Chairman of the Department, College of Arts and Sciences

ROBERT A. WEINBERG—DOCTOR OF SCIENCE

Biologist, educator. Ph.D. Massachusetts Institute of Technology, 1969; Professor of Biology, Massachusetts Institute of Technology. His demonstration that normal cells contain genes which, upon activation, can cause the development of cancer has constituted a major advance in the understanding of cancer and holds great promise for improved diagnosis and cure. In addition to his numerous technical scientific papers, he has written articles on cancer in such general-circulation magazines as *Atlantic Monthly* and *Scientific American*. Last year, Weinberg was awarded the Robert Koch Medal by the Koch Foundation of Bonn.

Presented by Dante G. Scarpelli, Magerstadt Professor of Pathology and Chairman of the Department, Medical and Dental Schools

ARTHUR STANLEY LINK—DOCTOR OF LITERATURE

Historian, educator. Ph.D. University of North Carolina, 1945; George Henry Davis '86 Professor of American History, Princeton University. The leading authority on Woodrow Wilson and his times, he is the author of a five-volume biography of Wilson as well as several shorter studies and volumes of essays. He is also the editor of *The Papers of Woodrow Wilson*, of which 43 volumes have thus far been published. A member of the Northwestern Department of History from 1949 to 1960, Link has twice won the Bancroft Prize in American History and was the first recipient of the Boyd Prize of the Association for Documentary Editing. He is currently President of both the American Historical Association and the Organization of American Historians.

Presented by Richard W. Leopold, William Smith Mason Professor of American History Emeritus, College of Arts and Sciences.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This not only helps in tracking expenses but also ensures compliance with tax regulations.

In the second section, the author provides a detailed breakdown of the company's revenue streams. This includes sales from various product lines and services. The data shows a steady increase in revenue over the past year, which is attributed to strategic marketing efforts and product diversification.

The third section focuses on the company's operational costs. It details the expenses related to manufacturing, distribution, and administrative functions. The analysis reveals that while some costs have increased due to inflation, overall efficiency has improved, leading to a higher profit margin.

Finally, the document concludes with a summary of the company's financial performance. It highlights the key achievements and areas for future improvement. The author expresses confidence in the company's ability to continue its growth trajectory in the coming year.
